

PILLAR 3 DISCLOSURES OF BASEL III AS ON 30.09.2025

RBI issued Basel III guidelines, applicable w.e.f. 01.04.2013 and at present with full implementation of Basel III guidelines, minimum capital to risk-weighted assets ratio (CRAR) is 11.50%, minimum Common Equity Tier -1 ratio is 8.00% and minimum Tier 1 ratio is 9.50%. Minimum capital required to be held by Bank for the year ended 30th Sept 2025 is 11.50% with minimum CET 1 (incl. CCB) of 8.00%. Bank has maintained CRAR of 17.94% as on 30.09.2025 against Regulatory requirement of 11.50% (including CCB)

Basel III framework consists of three mutually reinforcing pillars:

- (i) Pillar 1: Minimum Capital Requirement (Credit Risk, Market Risk and Operational Risk)
- (ii) Pillar 2: Supervisory Review and Evaluation Process
- (iii) Pillar 3: Market Discipline

Market Discipline (Pillar 3) consists of set of disclosures on capital adequacy and risk management framework of Bank. These disclosures have been set out as under:

RISK MANAGEMENT

Risk taking is an integral part of the banking business. Banks assume various types of risks in its activities while providing different kinds of services based on its risk appetite. Each transaction that the Bank undertakes changes the risk profile of the Bank. In the normal course of business, a bank is exposed to various risks including Credit Risk, Market Risk, Operational Risk, Liquidity risk and others. The objective of risk management is not to prohibit or prevent risk taking activity, but to ensure that the risks are consciously taken with full knowledge, clear purpose and understanding so that it can be measured and mitigated. With a view to managing such risks efficiently and strengthening its risk management systems, the bank has put in place various risk management measures and practices which include policies, tools, techniques, monitoring mechanism and management information systems (MIS).

The Bank, on a continuous basis, aims at enhancing and maximizing the shareholder's value by achieving appropriate trade-off between risks and returns. The Bank's risk management objectives broadly cover proper identification, measurement, monitoring, control and mitigation of the risks with a view to enunciate the bank's overall risk philosophy. The risk management strategy adopted by the bank is based on an understanding of risks and the level of risk appetite of the bank. Bank's risk appetite is demonstrated broadly through prescription of risk limits & trigger points in bank's Risk Appetite Statement and ICAAP i.e Internal Capital Adequacy Assessment Process.

The bank has set up appropriate risk management organization structure in the bank. Risk Management Committee of the Board (RMCB), a sub-committee of the Board, is constituted which is responsible for management of credit risk, market risk, operational risk and other risks in the Bank. The bank has also constituted internal risk management committees namely Credit Risk Management Committee (CRMC) for managing credit risk, Asset Liability Management Committee (ALCO), Funds Committee for managing market risk, Operational Risk Management Committee (ORMC) and Product/Process Risk Mitigation Committee (PRMC) for managing operational risk, and Information Security Committee for managing Information security.

A full-fledged Risk Management department is functioning at the Bank's Central Office, independent of the business departments for implementing best risk management systems and practices in the bank. A Chief Risk Officer in the rank of General Manager of the bank oversees the department who is responsible for overall supervision on risk management in the bank and is the convener for all the internal risk management committees. The Mid-Office in Risk Management and Credit Support Services Dept. and other functional departments/ branches in general also carry out the risk management functions and monitor the adherence/compliance to policies, risk limit framework and internal approvals. Risk Managers have been placed at Regional Offices. Apart from coordinating with Risk Management Department, Central Office for submission of various MIS, they participate in Regional Level Credit Approval Committees.

The basic approach to manage risk more effectively lies with controlling the risk at the point of its origination. The bank had implemented the New Capital Adequacy Framework (Basel-II) with effect from 31.03.2008 and is in compliance with the framework, in line with the guidelines issued by the RBI from time to time. Basel III guidelines have been introduced from 01.04.2013, and bank is maintaining capital as per Basel III guidelines. The Basel-III Framework is based on three mutually reinforcing pillars. While the first pillar of the revised framework addresses the minimum capital requirement for credit, market and operational risks, the second pillar of supervisory review process ensures that the bank has adequate capital to address all the risks in their business commensurate with bank's risk profile and control environment. As per RBI guidelines, the Bank has put in place a Board approved framework on Internal Capital Adequacy Assessment Process (ICAAP) to address second pillar requirements. This framework aims at assessing all material risks to which the bank is exposed over and above the regulatory prescriptions under the first pillar

risks and ensuring adequate capital structure to meet the requirements on an ongoing basis.

The bank has formulated a "Stress Testing framework" to assess the potential vulnerability of the organization to exceptional but plausible events in line with the guidelines issued by RBI on 2nd December 2013. In addition to this bank has also formulated "Stress Testing Framework" based on EASE guidelines. Stress testing and scenario analysis, particularly in respect of the bank's material risk exposure, enable identification of potential risks inherent in a portfolio at times of economic recession/downturn and accordingly suitable proactive steps are taken to address the same. In accordance with the policy prescriptions, the bank carries out various stress tests on bank's balance sheet periodically and specific portfolios and places the reports to ALCO/ RMCB / Board.

Board approved Business Continuity Plan and Disaster Recovery plan is in place. The 3-way data centers have been implemented to facilitate Zero data loss, Multiple MPLS-VPN high bandwidth connections at all 3 data Centers and Central, Dual connectivity from different alternate service/alternate providers and alternate media for branches have been established. Firewall and Intrusion detection systems have been implemented. A Security Operating Centre (SOC) has been established by the Information System Security Department to monitor and analyse the information security incidents to take corrective steps while IS Audit section takes care of the periodical Information Systems Audit of the Bank's department and branches. The bank has fine-tuned the information security systems in accordance with RBI guidelines. Regular DR drills are being conducted every quarter. To ensure Network security, periodical Vulnerability assessment and Penetration testing exercise are conducted by external experts.

The Bank is also in the process of upgrading its risk management systems and procedure for migrating to the advanced approaches envisaged under Basel III framework.

The third pillar of Basel-III framework refers to market discipline. The purpose of market discipline is to complement the minimum capital requirements detailed under Pillar 1 and the supervisory review process detailed under Pillar 2. In this context and as guided by RBI a set of disclosure (both qualitative and quantitative) is published in DF 1 to 18 (annexed) with regard to risk management in the bank, which will enable market participants to assess key pieces of information on the (a) scope of application (DF-1), (b) Capital Adequacy (DF-2), (c) Credit Risk: General Disclosures for all banks (DF-3), (d) Credit Risk: Disclosures for Portfolios subject to the

Standardized Approach (DF-4), (e) Credit Risk Mitigation: Disclosures for Standardised Approaches (DF-5), (f) Securitisation Exposures: Disclosure for Standardised Approach (DF-6), (g) Market Risk in Trading Book (DF-7), (h) Operational Risk (DF-8), (i) Interest Rate Risk in the Banking Book (IRRBB) (DF-9), (j) General Disclosure for Exposures Related to Counter Party Credit Risk (DF-10), (k) Composition of Capital (DF 11), Summary Comparison of accounting assets vs Leverage Ratio exposure measure (DF 17) and Leverage ratio common disclosure template (DF-18). This would also provide necessary information to the market participants to evaluate the performance of the bank in various parameters.

DF-1: Scope of Application

“Indian Overseas bank” is the entity to which the Basel III framework applies. The consolidated financial statements of the bank conform to Generally Accepted Accounting Principles (GAAP) in India, comprising regulatory norms, directions & guidelines prescribed by the Reserve Bank of India (RBI), Companies Act 2013, Accounting Standards issued by Institute of Chartered Accountants of India (ICAI) and the accounting practices prevalent in India.”

(i) Qualitative disclosures:

a. List of group entities considered for consolidation for the period ended 30.09.2025:

Name of the Entity	Country of Incorporation	Whether the entity is included under accounting scope of Consolidation (yes/ no)	Explain the method of consolidation	Whether the entity is included under regulatory scope of Consolidation (yes/ no)	Explain the method of consolidation	Explain the reasons for difference in the method of consolidation	Explain the reasons if consolidated under only one of the scopes of consolidation
Odisha Gramya Bank	India	Yes	As per AS 23	No	Not Applicable	Not Applicable	Associates not under the scope of consolidation
ACER Credit Rating Pvt Ltd	India	Yes	As per AS 23	No	Not Applicable	Not Applicable	Associates not under the scope of consolidation
India International Bank, Berhad, Malaysia	Malaysia	Yes	As per AS 27	No	Not Applicable	Not Applicable	Joint Venture not under the scope of consolidation

b. List of Group entities not considered for consolidation both under the accounting and regulatory scope of consolidation as on 30.09.2025(Rs. in Crore)

Name of the Entity	Country of Incorporation	Principal activity of the entity	Total Balance Sheet Equity (as stated in the accounting balance sheet of the legal entity)	% of the bank's holding in the total equity	Regulatory treatment of the Bank's investments in the capital instruments of the entity	Total Balance Sheet assets (as stated in the accounting balance sheet of the legal entity)
--------------------	--------------------------	----------------------------------	--	---	---	--

Universal Sampo General Insurance	India	General Insurance	368.18	18.06	NA	NA
-----------------------------------	-------	-------------------	--------	-------	----	----

ii. Quantitative disclosures:

c. List of Group entities considered for consolidation as on 30.09.2025 (Rs. in Crore)

Name of the Entity	Country of Incorporation (as indicated in (i)a. above)	Principal activity of the entity	Total Balance Sheet Equity (as stated in the accounting balance sheet of the legal entity)	Total Balance Sheet assets (as stated in the accounting balance sheet of the legal entity)
Odisha Gramya Bank	India	Banking	3417.09*	34725.12*
India International Bank, Berhad, Malaysia \$	Malaysia	Banking	655.09**	647.52**
ACER Credit Rating Pvt Ltd	India	Other financial activities	25.00***	26.14***

*Banks shares of Equity in Odisha Gramya Bank is Rs. 1195.98 Crore (3417.09 *35%)

** Banks shares of Equity in India International Bank, Berhad, Malaysia is Rs.229.28 Crore (655.09*35%)

***Banks shares of Equity in ACER Credit Rating Pvt Ltd is Rs. 6.50 Crore (25.00*26%)

\$ The account of Joint venture India International Bank, Berhad, Malaysia is prepared on a calender year basis in accordance with local requirements. The financial of Joint venture (JV) is as on 30.06.2025

d. The aggregate amount of capital deficiencies in all subsidiaries which are not included, in the regulatory scope of consolidation i.e., that are deducted:

Name of the Subsidiaries / Country of Incorporation	Principal activity of the entity	Total Balance Sheet Equity (as stated in the accounting balance sheet of the legal entity)	% of the bank's holding in the total equity	Capital deficiencies
Not applicable				

e. The aggregate amounts (e.g. current book value) of the Bank's total interests in insurance entities, which are risk weighted:(Rs. in Crore)

Name of the insurance entities	Country of Incorporation	Principal activity of the entity	Total Balance Sheet Equity (as stated in the accounting balance sheet of the legal entity)	% of the bank's holding in the total equity/ proportion of voting power	Quantitative impact on regulatory capital of using risk weighting method vs. using the full deduction method
Universal Sompo General Insurance	India	General Insurance	368.18	18.06	Reduction of 1 bps in CRAR

f. Any restrictions or impediments on transfer of funds or regulatory capital within the Banking Group:

There is no restriction or impediments on transfer of funds or regulatory capital within banking group as of Sept 30, 2025.

DF -2: CAPITAL ADEQUACY

Qualitative Disclosures:

(a) A summary discussion of the Bank's approach to assessing the adequacy of its capital to support current and future activities

Bank has a process for assessing its overall capital adequacy in relation to Bank's risk profile and a strategy for maintaining its capital levels. The Process provides an assurance that Bank has adequate capital to support all risks inherent to its business. Bank actively manages its capital to meet regulatory norms by considering available options of raising capital.

The Bank has put in place a framework on Internal Capital Adequacy Assessment Process (ICAAP) in consideration of the relevant risk factors of the bank as a measure towards adequacy of capital available to meet the residual risk as part of Pillar 2 requirements. In addition to the credit risk, market risk and operational risk prescribed under Pillar 1, the bank has analyzed its portfolio and assessed different material risks under Pillar 2 that are either partially covered or not covered under Pillar 1. The ICAAP details the capital planning process and carries out an assessment covering measurement, monitoring, internal controls, reporting, capital requirement and stress testing of the following Risks:

- | | |
|---------------------------------------|----------------------|
| ➤ Rating Migration Risk/ Default Risk | ➤ Concentration Risk |
| ➤ Liquidity Risk | ➤ Interest Rate Risk |
| ➤ Reputational Risk | ➤ Model Risk |
| ➤ Strategic Risk | ➤ Compliance Risk |
| ➤ Residual Collateral Risk | ➤ Business Risk |
| ➤ Pension Obligation Risk | ➤ Technology Risk |
| ➤ Legal Risk | ➤ Outsourcing Risk |
| ➤ Country Risk | ➤ Settlement Risk |
| ➤ Key personnel Risk | ➤ Conduct Risk |

In terms of ICAAP, Bank has put in place appropriate mechanism to assess all the Material Risks.

The bank has formulated a "Stress Testing framework" to assess the potential vulnerability of the organization to exceptional but plausible events in line with the guidelines issued by RBI on 2nd December 2013. In addition to this bank has also formulated "Stress Testing Framework" based on EASE guidelines. Stress testing and scenario analysis, particularly in respect of the bank's material risk exposure, enable identification of potential risks inherent in a portfolio at times of economic

recession/downturn and accordingly suitable proactive steps are taken to address the same. In accordance with the policy prescriptions, the bank carries out various stress tests on bank's balance sheet periodically and specific portfolios and places the reports to appropriate committees.

Quantitative Disclosures

Capital Requirement

Bank's capital requirements have been computed using Standardized Approach for Credit Risk, Standardized Duration Method for Market Risk and Basic Indicator Approach for Operational Risk.

As on Sept 30, 2025, the Capital held by the bank is at 17.94 % of the Total Risk Weighted Assets against the regulatory requirement of 11.50% including CCB:

	Rs in Crores
	As on 30.09.2025
(b) Capital requirements for Credit Risk	
• Portfolio subject to Standardized Approach	14302.37
• Securitisation Exposures	0.00
(c) Capital requirements for Market Risk	
• Standardised Duration Approach	
- Interest Rate Risk	54.71
- Foreign Exchange Risk (including Gold)	20.70
- Equity Risk	147.10
c) Capital requirements for Operational Risk	
• Basic Indicator Approach	1807.00
d) Common Equity Tier1, Tier 1 & Total Capital Ratio	
• Common Equity Tier-I Capital Ratio	15.53%
• Tier 1 Capital Ratio (Tier 1 CRAR)	15.53%
• Total Capital Ratio (CRAR)	17.94%

DF-3: CREDIT RISK: GENERAL DISCLOSURES

a. Qualitative Disclosures

- **Definitions of past due and impaired assets (for accounting purposes)**

Non-performing assets

An asset becomes non-performing when it ceases to generate income for the Bank. A non-performing Asset (NPA) is an advance where

- (i) Interest and/or instalment of principal remain 'overdue' for a period of more than 90 days in respect of a Term Loan.
- (ii) The account remains 'out of order' for a period of more than 90 days, in respect of an Overdraft/Cash Credit (OD/CC).
- (iii) The bill remains 'overdue' for a period of more than 90 days in the case of bills purchased and discounted.
- (iv) Any amount to be received remains 'overdue' for a period of more than 90 days in respect of other accounts.
- (v) A loan granted for short duration crops is treated as NPA, if the instalment of principal or interest thereon remains overdue for two crop seasons and a loan granted for long duration crops is treated as NPA, if instalment of principal or interest thereon remains overdue for one crop season.
- (vi) An account would be classified as NPA only if the interest charged during any quarter is not serviced fully within 90 days from the end of the quarter.
- (vii) The amount of a liquidity facility remains outstanding for more than 90 days, in respect of securitization transactions undertaken in accordance with the RBI guidelines on securitization dated February 1, 2006.
- (viii) In respect of derivative transactions, the overdue receivables representing the positive mark to market value of a derivative contract, remain unpaid for a period of 90 days from the specified due date for payment.

'Out of Order' status

An account is treated as 'out of order' if the outstanding balance remains continuously in excess of the sanctioned limit/drawing power.

In cases where the outstanding balance in the principal operating account is less than the sanctioned limit/drawing power, but there are no credits continuously for 90 days as on the date of Bank's Balance Sheet, or where credits are not enough to cover the interest debited during the same period, such accounts are treated as 'out of order'.

'Overdue'

Any amount due to the Bank under any credit facility is 'overdue' if it is not paid on the due date fixed by the Bank.

- **Resolution of Stressed Assets**

Early identification and reporting of stress:

Identification of incipient stress in loan accounts, immediately on default*, by classifying stressed assets as special mention accounts (SMA) as per the following categories:

SMA Sub-categories	Basis for classification – Principal or interest payment or any other amount wholly or partly overdue between
SMA-0	1-30 days
SMA-1	31-60 days
SMA-2	61-90 days

* Default' means non-payment of debt when whole or any part or instalment of the amount of debt has become due and payable and is not repaid by the debtor or the corporate debtor. For revolving facilities like cash credit, default would also mean, without prejudice to the above, the outstanding balance remaining continuously in excess of the sanctioned limit or drawing power, whichever is lower, for more than 30 days.

- **Discussion of the Bank's Credit Risk Management Policy**

Organizational Structure for Credit Risk Management

The bank has put in place a well-structured loan policy and credit risk management policy duly approved by Board. The policy document defines organizational structure, role and responsibilities and processes whereby the Credit Risk carried by the Bank can be identified, quantified and managed within the framework that the Bank considers consistent with its mandate and risk tolerance. The Board has formed committees to oversee risk management processes, procedures and systems. Risk Management Committee of the Board (RMCB), a sub-committee of the board, is constituted which is responsible for management of Credit Risk. Credit risk is monitored by the bank on a bank-wide basis and compliance with the risk limits approved by Board / RMCB is ensured.

Policy & Strategy

The bank has taken earnest steps to put in place best credit risk management practices in the bank. In addition to Loan Policy and Credit Risk Management Policy, the bank has also framed Interest Rate Policy on Advances, Funds and Investment Policy, Counter Party Risk Management Policy and Country Risk

Management Policy, etc., which forms integral part of monitoring of credit risk in the bank. Besides, the bank has implemented a policy on collateral management and credit risk mitigation which lays down the details of securities (both prime and collateral) normally accepted by the Bank and administration of such securities to protect the interest of the bank.

Credit Risk Management encompasses identification, assessment, measurement, monitoring and control of the credit risk in exposures.

In the processes of identification and assessment of Credit Risk, the following functions are undertaken:

- (i) Developing and refining the Credit Risk Assessment (CRA) Models/Scoring Models to assess the Counterparty Risk, by taking into account the various risks categorized broadly into Financial, Business, Industrial and Management Risks, each of which is scored separately.
- (ii) Conducting industry research to give specific policy prescriptions and setting quantitative exposure parameters for handling portfolio in large / important industries, by issuing advisories on the general outlook for the Industries / Sectors, from time to time.
- (iii) Risk Analysis of the all the high values credit proposals are being carried out by Risk Management Department before placing it to Credit Sanctioning Committee.

The monitoring and control of Credit Risk includes setting up exposure limits to achieve a well-diversified portfolio across dimensions such as single borrower, group borrower and industries. For better risk management and avoidance of concentration of Credit Risks, internal guidelines on prudential exposure norms in respect of individual companies, group companies, Banks, individual borrowers, non-corporate entities, sensitive sectors such as capital market, real estate, sensitive commodities, etc., are in place. Credit Risk Stress Tests are conducted at Quarterly interval to identify vulnerable areas for initiating corrective action, where necessary.

Credit Rating and Appraisal Process:

The Bank manages its credit risk through continuous measuring and monitoring of risks at obligor (borrower) and portfolio level. The Bank has a robust internal credit rating framework and well-established standardized credit appraisal / approval process. Credit rating is a facilitating process that enables the bank to assess the

inherent merits and demerits of a proposal. It is a decision enabling tool that helps the bank to take a view on acceptability or otherwise of any credit proposal.

The rating models factor quantitative and qualitative attributes relating to Risk components such as Industry Risk, Business Risk, Management Risk, Financial Risk, Project risk (where applicable) and Facility Risk etc. The data on industry risk is regularly updated and supported by CRISIL, based on market conditions.

Sanctioning Powers:

The bank follows a well-defined multi layered discretionary power structure for sanction of loans and advances. Credit sanctioning at regional office and Central Office are happening through various committees. Specific Sanctioning Powers have been delegated to Branch Managers. RLPCs have been created for sanctioning of Retail Loans.

Checks and balances viz. separation of credit risk management from credit sanctions, system of assigning credit risk rating, validation of ratings, mechanism to price credit facilities depending on risk rating of customer, credit audit etc. are in place. Minimum entry level rating benchmarks are stipulated. A suitable mechanism is in place to monitor aggregate exposure on other banks and country exposures.

DF-4: CREDIT RISK: DISCLOSURES FOR PORTFOLIOS SUBJECT TO THE STANDARDISED APPROACH

Qualitative Disclosure

(a) For Portfolios subject to Standardised Approach

- **Names of Credit Rating Agencies used, plus reasons for any changes**

As per RBI Guidelines, the Bank has identified CARE, CRISIL, ICRA, India Rating, ACUTE Ratings and Research and INFOMERICS, BRICKWORKS (Domestic Credit Rating Agencies) and FITCH, Moody's and S&P (International Rating Agencies) as approved Rating Agencies, for the purpose of rating Domestic and Overseas Exposures respectively, whose ratings are used for the purpose of computing Risk-weighted Assets and Capital Charge.

- **Types of exposures for which each Agency is used**

- (i) For Exposures with a contractual maturity of less than or equal to one year (except Cash Credit, Overdraft and other Revolving Credits), Short-term Ratings given by approved Rating Agencies are used.
- (ii) For Cash Credit, Overdraft and other Revolving Credits (irrespective of the period) and for Term Loan exposures of over 1 year, Long Term Ratings are used.

- **Description of the process used to transfer Public Issue Ratings onto comparable assets in the Banking Book**

The key aspects of the Bank's external ratings application framework are as follows:

- All long term and short-term ratings assigned by the credit rating agencies specifically to the Bank's long term and short-term exposures respectively are considered by the Bank as issue specific ratings.
- Foreign sovereign and foreign bank exposures are risk-weighted based on issuer ratings assigned to them.
- The Bank ensures that the external rating of the facility/borrower has been reviewed at least once by the ECAI during the previous 15 months and is in force on the date of its application.
- Bank facility rating with the disclosure by the CRAs on the name of the bank and the corresponding credit facilities rated in the Press Releases (PR) issued on rating actions by the said CRA are only considered for Risk Weight purpose.

- Where multiple issuer ratings are assigned to an entity by various credit rating agencies, the risk weight is determined as follows:
 - If there is only one rating by a chosen credit rating agency for a particular claim, then that rating is used to determine the risk weight of the claim.
 - If there are two ratings accorded by chosen credit rating agencies, which map into different risk weights, the higher risk weight is applied.
 - If there are three or more ratings accorded by chosen credit rating agencies with different risk weights, the ratings corresponding to the two lowest risk weights are referred to and the higher of those two risk weights is applied, i.e., the second lowest risk weight.

DF-5: CREDIT RISK MITIGATION: DISCLOSURES FOR STANDARDISED APPROACHES

Qualitative Disclosures

(a) Policies and processes for, and an indication of the extent to which the bank makes use of, on- and off-balance sheet netting

On-balance sheet netting is confined to loans/advances and deposits, where the Bank have legally enforceable netting arrangements, involving specific lien with proof of documentation. The Bank calculates capital requirements on the basis of net credit exposures subject to the following conditions:

Where Bank:

- (a) has a well-founded legal basis for concluding that the netting or offsetting agreement is enforceable in each relevant jurisdiction regardless of whether the counterparty is insolvent or bankrupt.
- (b) is able at any time to determine the loans/advances and deposits with the same counterparty that are subject to the netting agreement; and
- (c) monitors and controls the relevant exposures on a net basis, it may use the net exposure of loans/advances and deposits as the basis for its capital adequacy calculation. Loans/advances are treated as exposure and deposits as collateral.

• Policies and Processes for Collateral Valuation and Management

In line with the regulatory requirements, the bank has put in place a well-articulated policy on collateral management and credit risk mitigation techniques duly approved by the bank's Board. The Policy document is the embodiment of various aspects of collateral management guidelines issued from time to time. It broadly lists out the nature and type of securities normally accepted by the bank. It broadly lists out the nature and type of securities normally accepted by the bank for lending and administration/ monitoring of such securities in order to safeguard /protect the interest of the bank so as to minimize the risk associated with it.

• Description of the main types of collateral taken by the Bank

The following collaterals are usually recognised as Credit Risk Mitigants under the Standardised Approach:

- Cash or Cash equivalent (Bank Deposits/NSCs/KVP/LIC Policy, etc.)
- Gold
- Securities issued by Central / State Governments

- **Main types of Guarantor Counterparty and their creditworthiness**

The Bank accepts the following entities as eligible guarantors, in line with RBI guidelines:

- Sovereign, Sovereign entities [including Bank for International Settlements (BIS), International Monetary Fund (IMF), European Central Bank and European Community as well as Multilateral Development Banks, Export Credit & Guarantee Corporation (ECGC) and Credit Guarantee Fund Trust for Micro and Small Enterprises (**CGTMSE**)], Public Sector Enterprises (PSEs), Banks and Primary Dealers with a lower risk weight than the counterparty.
- Other guarantors having an external rating of AA or better. In case the guarantor is a parent company, affiliate, or subsidiary, they should enjoy a risk weight lower than the obligor for the guarantee to be recognised by the Bank. The rating of the guarantor should be an entity rating which has factored in all the liabilities and commitments (including guarantees) of the entity.

- **Information about (Market or Credit) risk concentrations within the mitigation taken:**

The Bank has a well-dispersed portfolio of assets which are secured by various types of collaterals, such as: -

- Eligible financial collaterals listed above
- Guarantees by sovereigns and well-rated corporates,
- Fixed assets and current assets of the counterparty.

STANDARDISED APPROACH**

The Bank does not have any Securitisation exposure as on 30.09.2025

DF-7 MARKET RISK IN TRADING BOOK

(a)Qualitative disclosure

Market Risk:

Market Risk is defined as the possibility of loss to a bank in on & off-balance sheet position caused by changes/movements in market variables such as interest rate, foreign currency exchange rate, equity prices and commodity prices. Bank's exposure to market risk arises from domestic investments (interest related instruments and equities) in trading book (FVTPL-HFT category), the Foreign Exchange positions (including open position, if any, in precious metals) and trading related derivatives. The objective of the market risk management is to minimize the impact of losses on earnings and equity capital arising from market risk.

Policies for management of Market Risk:

The bank has put in place Board approved Market Risk Management Policy, Policy for quoting Interest Rate on Deposits and Asset Liability Management (ALM) policy for effective management of market risk in the bank. Other policies which deal with market risk management are Country Risk Management Policy, Counterparty Risk Management Policy, Risk Management Policy for Treasury Operations and Stress Testing policy. The Market Risk Management policy lays down well defined organization structure for market risk management functions and processes whereby the market risks carried by the bank are identified, measured, monitored and controlled within the ALM framework, consistent with the Bank's risk tolerance. The policies set various risk limits for effective management of market risk and ensuring that the operations are in line with Bank's expectation of return to market risk through proper Asset Liability Management. The policies also deal with the reporting framework for effective monitoring of market risk.

The ALM policy specifically deals with liquidity risk management and interest rate risk management framework. As envisaged in the policy, liquidity risk is managed through GAP analysis based on residual maturity/behavioral pattern of assets and liabilities on daily basis based on best available information data coverage as prescribed by RBI. The liquidity risk through Structural Liquidity statement was hitherto reported to RBI for domestic operation while the same was managed separately at each overseas center and placed to ALCO for control purpose in the past. However as per RBI guidelines from March 2013 the liquidity risk is computed and submitted to RBI in rupee and foreign currency for domestic operations, overseas centers and consolidated for Bank operations at various frequencies.

RBI has issued guidelines on two minimum standards for funding liquidity viz. Liquidity Coverage Ratio (LCR) to promotes short term resilience and Net Stable Funding Ratio (NSFR) to promotes resilience of Bank over a longer- term time horizon.

Liquidity Coverage Ratio (LCR) is computed on daily basis, placed to ALCO, and reported to RBI on monthly basis. Net Stable Funding Ratio (NSFR) is computed on an ongoing basis, placed to ALCO on monthly basis and reported to the RBI on quarterly basis.

The bank has put in place mechanism of contingent funding plan. Prudential (tolerance) limits are prescribed by RBI for the first four buckets and by Bank's Board for different residual maturity time buckets for efficient asset liability management. Liquidity profile of the bank is evaluated through various liquidity ratios. The bank has also drawn various contingent measures to deal with any kind of stress on liquidity position. Bank ensures adequate liquidity management by Domestic Treasury through systematic and stable funds planning.

Interest Rate Risk is managed through use of GAP analysis of rate sensitive assets and liabilities and monitored through prudential (tolerance) limits prescribed. The bank estimates Earnings at Risk (EaR) for domestic operations and modified duration gap for global operations periodically for assessing the impact on Net Interest Income and Economic Value of Equity with a view to optimize shareholder value.

The Asset-Liability Management Committee (ALCO) / Board monitors adherence to prudential limits fixed by the Bank and determines the strategy in the light of the market conditions (current and expected) as articulated in the ALM policy. The mid-office monitors adherence to the prudential limits on a continuous basis. As interest rate movements are volatile, particularly on deposits of Rs.3 Crore and above, hence interest rates for Bulk deposits approved by ALCO shall act as CAP and GM (Treasury) shall be empowered to quote finer interest rates complying the guidelines enumerated in Policy for Quoting Interest Rates on Deposits and operate within the CAP based on the present & projected liquidity position of the bank, requirement for immediate payment of funds, market trend regarding deployment opportunities available, impact on un-hedged forex exposure etc. to maximize the returns. ALCO shall review interest rate on Bulk domestic deposit (Deposits of Rs.3 crore and above) quoted during the previous month.

Further, the bank is also having dedicated Market Risk Management Policy which ensures that the Bank's operations are in line with management's expectations of return to market risk.

(b)Quantitative disclosures:

In line with the RBI's guidelines, the Bank has computed capital for market risk as per Standardised Duration Approach of Basel-II framework for maintaining capital. The capital requirement for market risk as on 30.09.2025 in trading book of the bank is as under:

Rs in Crores			
Type of Market Risk	Risk Weighted Assets (Notional)		Capital Requirement
Interest Rate Risk	683.87		54.71
Equity Position Risk	1838.77		147.10
Foreign Exchange Risk	258.74		20.70
Total	2781.38		222.51

DF – 8: OPERATIONAL RISK

Qualitative disclosures

Operational Risk is the risk of loss resulting from inadequate or failed internal processes, people and systems or from external events. Operational risk includes legal risk but excludes strategic and reputation risk.

The bank has framed operational risk management policy duly approved by the Board. Other policies adopted by the Board which deal with management of operational risk are (a) Information Systems security policy (b) Cyber Security Policy (c) forex risk management policy (d) Policy document on know your customer (KYC) and Anti-Money Laundering (AML) procedures (e) Business Continuity and Disaster Recovery Plan (BC-DRP) (f) compliance policy and (g) policy on outsourcing of Financial Services.

The Bank has got embodied in its Book of Instructions well-defined systems and procedures for various operations. Various internal and external audit systems are in place to ensure that laid down systems and procedures are followed, and timely actions are initiated for rectifying the deficiencies.

In line with the final guidelines issued by RBI, our bank is adopting the Basic Indicator Approach for computing capital for operational risk. As per the guidelines the bank holds capital for operational risk equal to 15% of positive average annual gross income over the previous three years as defined by RBI.

As on 30.09.2025

Rs in Crores

Parameter	Capital Amount	Notional Risk Weighted Assets
15% of positive average annual gross income over the previous 3 years as defined by RBI	1807.00	22587.45

DF – 9: INTEREST RATE RISK ON THE BANKING BOOK (IRRBB)

Qualitative disclosures:

Interest rate risk is the potential that a change in overall interest rates will reduce the value of a bond or other fixed-rate investment. As interest rates rise bond prices fall, and vice versa. This means that the market price of existing bonds drops to offset the more attractive rates of new bond issues. Changes in interest rates may affect both the current earnings (earnings perspective) as also the net worth of the Bank (economic value perspective). The risk from earnings perspective can be measured as impact on the Net Interest Income (NII) or Net Interest Margin. Similarly, the risk from economic value perspective can be measured as drop in Economic Value of Equity.

Risk monitoring is an ongoing process and risk positions are analyzed and reported to Top Management of the Bank, Market Risk Management Committee and Risk Management Committee of the Board.

Forex Open position limit (Daylight/overnight), Stop Loss Limit, Aggregate Gap Limit as approved by the Board is monitored and exceptions, if any, is reported to Risk Management Committee of the Board and Top Management of the Bank.

Value at Risk (VaR) computation is carried out on daily basis. Market Risk Stress Testing is carried out at fortnightly intervals as a complement to Value at Risk. Results are reported to Risk Management Committee of the Board and Top Management of the Bank.

The bank has adopted Traditional Gap Analysis combined with Duration Gap Analysis for assessing the impact (as a percentage) on the Economic Value of Equity (Economic Value Perspective) on global operations by applying a notional interest rate shock of 200 bps over a time horizon of one year. For the purpose a limit of (+/-) 1.00% for modified duration gap is prescribed in the Bank's ALM policy and the position is monitored periodically.

The bank is computing the interest rate risk position in each currency applying the Duration Gap Analysis (DGA) and Traditional Gap Analysis (TGA) to the Rate Sensitive Assets (RSA)/ Rate Sensitive Liabilities (RSL) items in that currency, where either the assets, or liabilities are 5 per cent or more of the total of either the bank's global assets or global liabilities. The interest rate risk positions in all other residual currencies are computed separately on an aggregate basis.

Quantitative disclosures:

The impact of changes of Net Interest Income (NII) and Economic Value of Equity (EVE) calculated as on 30.09.2025 by applying notional interest rate shocks as discussed above are as under

Rs in Crores			
Change in Interest Rate	ALM Policy Limit for EaR	Earnings at Risk (EaR) 30.09.2025	
		Up to 1 Year	Up to 5 Years
0.25% change	326.70 (3% of NII of previous year)	16.16	27.68
0.50% change	653.40 (6% of NII of previous year)	32.32	55.36
0.75% change	980.10 (9% of NII of previous year)	48.48	83.04
1.00% change	1306.80 (12% of NII of previous year)	64.64	110.72
2.00% change	2613.60 (24% of NII of Previous year)	129.28	221.44
ECONOMIC VALUE OF EQUITY			30.09.2025
Modified Duration Gap (DGAP) in %			-0.04
Limit as per ALM Policy			(+/-) 1.00%
Market value of Equity (MVE)			
For a 200 BPS Rate Shock the Drop in Equity Value in %			1.26%

DF – 10: GENERAL DISCLOSURE FOR EXPOSURES RELATED TO COUNTERPARTY CREDIT RISK

(a) Qualitative disclosures

Bank is participating in derivative market as a user to hedge risk of underlying exposure of its own and that of its customers. Keeping in view business composition of Bank, nature and mix of clients, capital requirement as also risk appetite, the activities in this segment are governed by the Derivatives Policy approved by the Bank's Board. Bank is dealing in derivative product such as Foreign Exchange Forward Contract.

Measurement and management of various risks is ensured by setting up various limits such as counter party limits, stop loss limits, Day light Limits, Overnight limit, Stop Loss Limits and exposure limits etc. at various levels. Utilization of such limits would be subject to guidelines of Investment Management Policy and RBI/SEBI/Exchanges.

DF 15- Disclosure Requirement for Remuneration

Not applicable for Public Sector Bank.

Table DF-16: Equities – Disclosure for Banking Book Positions

Qualitative Disclosures	
1	<p>The general qualitative disclosure requirement (Para 2.1 of this annex) with respect to equity risk, including:</p> <ul style="list-style-type: none"> • differentiation between holdings on which capital gains are expected and those taken under other objectives including for relationship and strategic reasons; and • discussion of important policies covering the valuation and accounting of equity holdings in the banking book. This includes the accounting techniques and valuation methodologies used, including key assumptions and practices affecting valuation as well as significant changes in these practices

Quantitative Disclosures		In Crs
1	Value disclosed in the balance sheet of investments, as well as the fair value of those investments; for quoted securities, a comparison to publicly quoted share values where the share price is materially different from fair value.	0.00
2	The types and nature of investments, including the amount that can be classified as: <ul style="list-style-type: none"> • Publicly traded; and • Privately held. 	442.25 2123.28
3	The cumulative realised gains (losses) arising from sales and liquidations in the reporting period.	2.44
4	Total unrealised gains (losses) ¹³	*259.48
5	Total latent revaluation gains (losses) ¹⁴	0.00
6	Any amounts of the above included in Tier 1 and/or Tier 2 capital.	**1195.98
7	Capital requirements broken down by appropriate equity groupings, consistent with the bank's methodology, as well as the aggregate amounts and the type of equity investments subject to any supervisory transition or grandfathering provisions regarding regulatory capital requirements.	Nil

¹³ Unrealized gains (losses) recognized in the balance sheet but not through the profit and loss account.

*Unrealized gains in unquoted shares transferred AFS Reserve after net taxes.

¹⁴ Unrealized gains (losses) not recognized either in the balance sheet or through the profit and loss account.

**Indicates Bank's investment in share Capital of Odisha Gramya Bank as a Sponsor.

DF 17- Summary comparison of accounting assets vs. leverage ratio exposure measure

	Items	Amount (Rs in Crores)
1	Total consolidated assets as per published financial statements	464737
2	Adjustment for investments in banking, financial, insurance or commercial entities that are consolidated for accounting purposes but outside the scope of regulatory consolidation	545
3	Adjustment for fiduciary assets recognised on the balance sheet pursuant to the operative accounting framework but excluded from the leverage ratio exposure measure	0
4	Adjustments for derivative financial instruments	3164
5	Adjustment for securities financing transactions (i.e. repos and similar secured lending)	0
6	Adjustment for off-balance sheet items (i.e. conversion to credit equivalent amounts of off- balance sheet exposures)	21519
7	Other adjustments	28499
8	Leverage ratio exposure	460376

DF-18: Leverage ratio common disclosure template

	Items	Rs in Crores
1	On-balance sheet items (excluding derivatives and SFTs, but including collateral)	464737
2	(Asset amounts deducted in determining Basel III Tier 1 capital)	29044
3	Total on-balance sheet exposures (excluding derivatives and SFTs) (sum of lines 1 and 2)	435694
	Derivative exposures	
4	Replacement cost associated with all derivatives transactions (i.e. net of eligible cash variation margin)	614
5	Add-on amounts for PFE associated with all derivatives transactions	2550

6	Gross-up for derivatives collateral provided where deducted from the balance sheet assets pursuant to the operative accounting framework	---
7	(Deductions of receivables assets for cash variation margin provided in derivatives transactions)	---
8	(Exempted CCP leg of client-cleared trade exposures)	---
9	Adjusted effective notional amount of written credit derivatives	---
10	(Adjusted effective notional offsets and add-on deductions for written credit derivatives)	---
11	Total derivative exposures (sum of lines 4 to 10)	3164
	Securities financing transaction exposures	
12	Gross SFT assets (with no recognition of netting), after adjusting for sale accounting transactions	---
13	(Netted amounts of cash payables and cash receivables of gross SFT assets)	---
14	CCR exposure for SFT assets	0
15	Agent transaction exposures	---
16	Total securities financing transaction exposures (sum of lines 12 to 15)	0
	Other off-balance sheet exposures	
17	Off-balance sheet exposure at gross notional amount	49360
18	(Adjustments for conversion to credit equivalent amounts)	(27841)
19	Off-balance sheet items (sum of lines 17 and 18)	21519
	Capital and total exposures	
20	Tier 1 capital	28625
21	Total exposures (sum of lines 3, 11, 16 and 19)	460376
	Leverage ratio	
22	Basel III leverage ratio	6.22%
